

Kenworth truck w/ N-14 Cummins Diesel

K. E.

April 29, 2008

Hello my name is Kent and I own and drive a Kenworth truck that has a N-14 cummins motor in it, it has right at 995,000 miles on it and it started using a lot of oil, when I say a lot I am talking about on a 3,000 mi. week it would use 5 gal. of engine oil. I heard about this product in Tx. from a dealer and said I wanted to try it, I put it in and now have driven it about for 2 months, in the last 2 weeks I have really been able to tell a BIG difference in my engine it is really pulling good and I add 1 gal. a week now, it has almost quit smoking also. This Cerma is no joke, it has completely turned my 'wore' out motor and made it to where I am not going to have to overhaul it this year. Thank you, so much Cerma!
